

TELL CONGRESS: TAKE BACK OUR MONETARY SYSTEM

The N.E.E.D. Act – HR 2990

NATIONAL EMERGENCY EMPLOYMENT DEFENSE ACT of 2011

Sponsored by: Representatives Dennis Kucinich, John Conyers

See full text at: <http://www.monetary.org/hr2990>

“Over time, whoever controls the money system, controls the nation” – Stephen Zarlenga, Director, The American Monetary Institute; Author of The Lost Science of Money.

Our money system has been privatized

Do you want banks creating your money for their private profit?

Demand your Representative co-sponsor HR 2990:

- **Dismantles the Federal Reserve** – taking its power over our monetary policy; transferring monetary policy to an independent body accountable to We the People
- **Stop banks creating our money** – end their unjustifiable privilege of creating our money for their own private profit, which creates bubbles and crashes
- **End the recession by using the money saved to rebuild our infrastructure** – reclaiming our Constitutional power over our money means we can rebuild our infrastructure without taxing or borrowing and without inflation, because new goods and services are created with the money, and there's no interest charges

What HR 2990 does for America:

- **Solves the Debt crisis** – pays off the national debt over time as it comes due without any more taxing or borrowing and without inflation or recession
- **Gets money flowing through the economy** – enables individuals, households, businesses and Federal, State and local governments to clear their debts
- **Creates millions of Good Jobs right here in America** – well paying jobs that can't be outsourced and provide real career opportunities for school and college graduates, and for our troops returning home from Iraq and Afghanistan
